

Training Guide

1) **Personal setup:**

- a) Create a personal Inhouz Cloud account by visiting [Inhouz Cloud](#).
- b) [Visit our YouTube channel](#). Watch the tutorial videos to learn how to build software systems using Inhouz Cloud.
- c) Training should take between 1 to 2 weeks.

2) **Guided training:**

- a) Along with the personal training, there will be a one week training with an Inhouz Cloud developer hosted online via Zoom, Microsoft Teams, or Google Meets.
- b) This will be 1 hour a day for 5 days.
- c) The goal of this guided training is to boost the learning experience and in some way guarantee that you will be ready on day one.

3) **Assessment:**

- a) After the training, there will be a one week assessment test.
- b) In this test, you would have to build a web app using different modules of the Inhouz Cloud platform.
- c) The goal of this assessment is to confirm that you have an understanding of how to build using Inhouz Cloud.
- d) Everything will be scrutinized, even the name of variables will be scrutinized, it is important to go above and beyond in this deliverable.
